local community*

HOME CARE PACKAGES

This program is subsidised by the Australian Government for older people who require ongoing care and support to live independently at home. There are four levels of Home Care Package depending on your assessed needs, ranging from very basic care through to high care.

Samarinda Home Care can assist you with contacting My Aged Care, the Australian Government aged care entry system. We can even be with you through the assessment process if needed.

Planning your services

Our professional staff will assist you to make informed decisions, design your care plan, select your service providers, develop your individual budget and ensure that services enable you to live independently at home for as long as you can.

Service can include: personal care, home help, meal support, transport, shopping, respite care, social support, connecting with local community groups and activities, equipment and home modifications.

Our flexible and responsive approach ensures that if your needs or circumstances change we will work with you to change your care plan and access other services if required.

What will it cost?

For people in receipt of the full pension, Samarinda has opted not to charge any fees, however if your income level is above the Government determined threshold then we are required to collect an income-tested fee set by Centrelink.
